**Skyview Designs**  
08/17-Present (1 year)

**Frontend Developer**

Contracted by the Quiet Company to build a responsive site for a video editing portfolio  
Designed and monitored standards for UI, page design, and graphics development  
Web page development from design to test and up to web hosting and management  
Building sites with modern designs using frameworks that are responsive and interactive  
Implementing full webstacks featuring the frontend, backend servers, and database systems

**Dope Games**  
01/14-04/16 (2 years)

**iOS Developer**

Designed and developed multiple applications that were distributed through the App store  
Published and programmed games using Objective-C, Unity and Cocos2d  
Engineered multiple custom animations, transitions, and UI components  
Worked on numerous projects and frameworks, client-server communication, AFNetworking, Core Motion, SpriteKit, Firebase database manipulation, and other unique features  
Proficient in Adobe Illustrator and Photoshop to design my own UX and animation

**App Partner**  
06/13-012/13 (7 months)

**iOS Developer**

Contracted to develop and implement various games as per specifications  
Used various tools and frameworks to develop feature-rich games, like Core Graphics / Motion, Unity, and Cocos2d  
Responsible for bug fixes, crashes, and design enhancements to multiple apps  
Worked closely with QA and clients to define requirements and technical specifications  
Developed innovative game play applications in coordination with artists and engineers

---

**Projects**  
08/17-Present

Implemented multiple projects with features like face image recognition API, frontend registration/login, backend servers, and database systems  
Executed and contributed to full-stack web development projects, with an emphasis on frontend features, browser manipulation, and cross-browser compatibility  
Fully document my code and progress using Git version control system  
Designed and implemented sites in React Redux to deploying sites to Heroku  
Workflow tools included: Javascript, HTML, CSS, Node, Express, PostgreSQL, jQuery, and Git

---

**EDUCATION**  
2004

**CUNY @ QUEENS COLLEGE**  
B.S., Computer Science

---

**SKILLS**

Javascript, HTML5, CSS3, React, Redux, PostgreSQL, Node, Express, Bootstrap, Heroku, Objective-C, iOS, and Javascript Frameworks, Git, REST APIs, Illustrator, Photoshop
